- B. Ground Receiver Finish: following fabrication the receiver, covers and lock well covers shall be hot dip galvanized to ASTM A 123, 3 to 4 mils thick.

PART 3 EXECUTION

3.1 EXAMINATION

- A. Verify existing conditions before starting work. Do not proceed until unsatisfactory conditions are corrected in manner acceptable.
- B. Verify that foundation, applied finishes and adjacent construction are ready to receive bollards and are level, plumb and square within tolerances acceptable to manufacturer.

- C. Verify that required utilities are in correct location and are of correct capacities for specified products.
- D. If preparation and condition is the responsibility of another installer, notify Architect of unsatisfactory preparation before proceeding.

3.2 INSTALLATION

- A. Install in accordance with manufacturer's instructions.

**** NOTE TO SPECIFIER **** *Select the required mounting type(s) from the following paragraphs and delete those not used. Indicate installation hole and mounting locations on the Drawings.*

- B. Removable mounting. Provide depth and diameter of installation hole as indicated on the Drawings. Receiver is to be extended a minimum of 24 inches (610 mm) below finish surface and cast in concrete. The receiver must be installed over a layer of gravel for drainage.
- C. Embedded mounting. Provide depth and diameter of installation hole as indicated on the Drawings. Bollard pipe is to be extended a minimum of 18 inches (457 mm) below finish surface and cast in concrete.
- D. Surface mounting. Provide location and drilling of holes for inserts as indicated on the Drawings. Anchor bolts and inserts provided by others.
- E. Electrical Connections for LED lighted bollards - Coordinate connection to utilities as specified in Sections of Division 16.

3.3

3.4 PROTECTION

- A. Protect installed products until completion of project.
- B. Touch-up, repair or replace damaged products before Substantial Completion.
