

Zena Collection

Zena has a pronounced, highly tapered design; its lightweight GFRC concrete is durable for high traffic locations yet light enough to be moved. With a wide rim and a narrow waist, these planters can be used as focal points and add a sleek style to urban areas.

Zena Collection, GFRC

- Lightweight GFRC concrete planters designed to be durable despite low weight
- Coordinates with our self-watering container irrigation products
- Drain holes standard
- Round planter sizes from 24" to 60"

Zena Collection, GFRC

- Lightweight GFRC concrete planters designed to be durable despite low weight
